Sudharshan Reddyam

Full Stack Engineer | MEAN Stack Developer

Phone: +443-316-77151
Email: sudharshan.ui@gmail.com
LinkedIn: https://www.linkedin.com/in/sudharshanredyam/
Location: Frisco, Dallas Area, Texas

Professional Summary

- Senior Full Stack Engineer with 13+ years of experience specializing in Full Stack development with Java or NodeJS as backend and modern web technologies
- Expertise in Angular 19, React, Node.js, Java Spring Boot, and cloud technologies with proven ability to lead teams and deliver scalable applications
- Strong background in microservices architecture, CI/CD pipelines, and accessibility compliance with experience migrating legacy applications to modern frameworks
- Demonstrated success in cross-functional collaboration, agile methodologies, and implementing clean code practices across enterprise-level projects

---

Technical Skills

Frontend Technologies: JavaScript, TypeScript, Angular 19, React, HTML5, CSS3, Tailwind CSS, SCSS, Bootstrap, Material UI, RxJS, NgRx, Redux Toolkit

Backend Technologies: Node.js, Express.js, NestJS, Java, Spring Boot, RESTful APIs, GraphQL, Apollo WebClient, Microservices Architecture

Databases: MongoDB, MySQL, SQL

Cloud & DevOps: AWS (S3, Lambda, EC2, CloudFront, API Gateway, CloudWatch, DynamoDB), Firebase, Docker, Kubernetes, Jenkins, CI/CD, Groovy, Kafka, Splunk

Development Tools: NX Monorepo, Webpack, Git, JIRA, Postman, Swagger, Splunk, Jenkins

Testing & Quality: Jest, Cypress, Unit Testing, TDD/BDD, Code Reviews

Methodologies: Agile, Scrum, Clean Code Practices, WCAG Accessibility Compliance

---

Professional Experience

October 2023 - Present

Full Stack Engineer
Fidelity Investments | Frisco, Texas

- Develop and maintain enterprise-level applications using Angular 19, NX monorepo architecture, and modern frontend technologies
- Implement scalable backend solutions using Java Spring Boot and NestJS for B2B partner API communications
- Build responsive user interfaces with Tailwind CSS and manage complex state using RxJS and Apollo WebClient
- Design and implement GraphQL APIs for efficient data fetching and partner integrations
- Create and maintain robust CI/CD pipelines using Jenkins with Groovy scripting for automated deployments and continuous integration
- Develop comprehensive logging and monitoring dashboards using Splunk for real-time application performance tracking and system observability
- Implement event-driven architecture using Kafka for reliable message streaming and asynchronous service communication
- Collaborate with cross-functional teams to deliver high-quality financial technology solutions

Environment: Angular 19, NX Monorepo, Tailwind CSS, RxJS, Apollo WebClient, Webpack, Java, Spring Boot, NestJS, GraphQL, Jenkins, Groovy, Kafka, Splunk

April 2023 - September 2023

Senior Software Engineer - Full Stack Angular with Java
American Tire Distributors | Charlotte, NC

- Developed scalable and performant web applications using Angular 14+ with Java Spring Boot backend and modern full stack technologies
- Collaborated with cross-functional teams to gather requirements, design UI/UX components, and implement RESTful APIs using Spring Boot
- Built robust backend services using Java Spring Boot with comprehensive error handling, validation, and security implementation
- Implemented comprehensive unit testing using Jest for frontend and JUnit for Java Spring Boot backend to ensure code quality
- Utilized AWS services including S3 and CloudFront for efficient file storage and integrated with Spring Boot applications

- Enforced clean code practices following SOLID, DRY, and YAGNI principles in both Angular and Java Spring Boot development
- Actively participated in Agile/Scrum ceremonies including sprint planning, daily stand-ups, and retrospectives

Environment: Angular 14+, Java, Spring Boot, RESTful APIs, JWT, Tailwind CSS, Cypress, Jest, JUnit, AWS S3, CloudFront

October 2020 - March 2023

Senior Software Engineer - MEAN Stack
Google | Flow Maker Project

- Developed and maintained enterprise-scale web applications using Angular 14+, TypeScript, and modern frontend frameworks
- Implemented sophisticated state management using NgRx for efficient component communication and data flow
- Designed and developed microservices-based architecture using Node.js and Express.js for improved scalability
- Utilized containerization technologies including Docker and Kubernetes for microservice deployment and management
- Implemented event-driven architecture using RabbitMQ for asynchronous communication between microservices
- Integrated comprehensive monitoring and logging solutions using Prometheus and ELK Stack for system observability
- Designed and implemented RESTful APIs with proper authentication and authorization using JWT tokens
- Collaborated with DevOps teams to establish CI/CD pipelines and maintain high availability systems

Environment: Angular 14+, RxJS, NgRx, Node.js, Express.js, TypeScript, JWT, RESTful APIs, Microservices, Docker, Kubernetes, RabbitMQ, Kafka, Jenkins, Splunk, AWS (EC2, S3, Lambda, API Gateway, CloudWatch, DynamoDB)

October 2019 - September 2020

Senior Software Engineer
Google | BizApps Project

- Developed and maintained complex web applications using Angular and TypeScript with focus on performance optimization
- Implemented NgRx for efficient state management and component communication in large-scale applications
- Designed microservices architecture using Node.js and Express.js to improve application modularity and scalability
- Configured AWS API Gateway and Lambda functions for serverless computing and efficient request handling
- Implemented comprehensive logging and monitoring using CloudWatch and utilized DynamoDB for data management
- Collaborated with cross-functional teams in Agile environment ensuring quality deliverables and timely project completion

Environment: Angular, TypeScript, NgRx, Node.js, Express.js, RESTful APIs, Microservices, AWS (EC2, S3, Lambda, API Gateway, CloudWatch, DynamoDB)

December 2018 - September 2019

Senior Software Engineer
Ericsson MediaKind | TV Platforms & Media Project

- Contributed as individual contributor in full stack development for entertainment and media platform applications
- Developed specialized modules for Sports, Entertainment, Live content, Most Watched, and Favorites categories
- Implemented Single Sign-On (SSO) authentication using JWT protocol for secure user access management
- Configured messaging brokers for inter-service communication within microservices architecture
- Addressed critical security vulnerabilities including CSRF, XSS, and DOS attack prevention measures
- Implemented WCAG accessibility compliance features for users with disabilities
- Enhanced code coverage through comprehensive unit testing implementation for legacy codebase

Environment: TypeScript, ES6, jQuery, Backbone.js, Node.js, HTML5, CSS3, Sass, QUnit, Sinon, Karma

November 2016 - November 2018

Senior Software Engineer
bwin.com

- Created foundational architecture and design patterns for casino gaming platform integration
- Successfully integrated multiple third-party casino games from various vendors into host website platform
- Established secure cross-domain communication protocols between host and customer websites
- Improved application performance by implementing WebSocket connections for persistent real-time communication
- Developed automated templating system to streamline third-party integrations and reduce error rates
- Led technical communication with development teams and provided guidance on complex implementation challenges

Environment: HTML5, JavaScript, jQuery, Node.js, AngularJS, Bootstrap, CSS3

January 2017 - September 2017

Senior Software Engineer - Lead Developer
pobyt.co

- Architected and developed complete mobile application for hotel booking platform from inception to release
- Implemented social authentication integration including Facebook and Google login functionality
- Integrated Google Maps API with custom markers, directions, and distance calculation features
- Configured push notification system using OneSignal for user engagement and booking updates
- Integrated multiple payment gateways including Razor Pay and Paytm for secure transaction processing
- Developed comprehensive wallet service for user account balance management and transactions
- Established Git webhooks for continuous integration and automated deployment processes

Environment: Ionic2, TypeScript, Angular 2, SCSS, Google Maps API, Firebase, OneSignal, Git

January 2016 - September 2016

Software Engineer
Cambridge University

- Designed and developed automation tool architecture using PHP for educational content generation
- Created 13 foundational templates serving as core components for automated SCORM package generation
- Delivered ready-to-deploy SCORM packages for client Learning Management System integration
- Facilitated rapid learning experience implementation reducing deployment time to 6 months
- Maintained direct client communication providing technical guidance and project status updates

Environment: HTML5, CSS3, JSON, jQuery, XML, PHP

July 2015 - September 2015

Software Engineer
Allergan

- Developed cross-platform mobile application framework using jQuery and HTML5 architecture
- Implemented multi-module system capable of handling various application components
- Deployed and tested applications using PhoneGap/Cordova for iOS7 and Android platforms
- Ensured cross-platform compatibility and optimal performance across mobile devices

Environment: HTML5, CSS3, JSON, jQuery, PhoneGap (Cordova)

April 2012 - September 2015

Project Lead
Walmart | E-Survey Platform

- Led frontend development team of 8 developers in creating comprehensive e-survey solutions for data collection
- Developed surveys using Dimensions platform for client business intelligence and customer insights
- Implemented CI/CD processes for automated testing and deployment across multiple environments
- Managed project delivery ensuring quality standards and client satisfaction

Environment: HTML5, CSS3, JSON, jQuery, Dimensions

Certifications

- **Graph Developer - Associate**

- **Architecting with Google Compute Engine**
- **Oracle Certified Java Professional**

Education

Bachelor of Technology

Jawaharlal Nehru Technological University | 2011
